Exam

Passed/NOT Passed exam (no final score)

Exam is based on **projects** that **will be provided or can be proposed** by groups of students

Projects are assigned to **groups of 3-5 people** (limited exceptions)

Groups have to:
- develop a working web application using the tools presented during the course
- provide small technical documentation
- present their work (working demo) and answer to few questions on the course contents

A project can be used for the bachelor final exam

Additional details will be available in the forthcoming weeks
